Legal Innovators – Learn, Share and Network

Welcome to the inaugural Legal Innovators event in London, 11 October.

It's a conference for everyone interested in technology, innovation and the business of law - created by Artificial Lawyer and organised by Cosmonauts.

Legal Innovators is for learning, sharing and networking.

It's for everyone who wants to learn about this increasingly important subject area that is steadily reshaping the legal market. Whether you are a Managing Partner of a law firm, a General Counsel inside a company, a professional focused on technology and legal services delivery, or a young lawyer, there is something for you at Legal Innovators.

Legal Innovators is for everyone who wants to learn, to share, and meet their peers. It's for people just starting to explore this area, as well as for those who are already very experienced, but want to know what is now 'market standard' in this rapidly changing field.

Some of the topics that will be explored on the day by our fantastic group of experts, include:

- How do you build and run an effective innovation team?
- How can you scale up real change in law firms and inhouse teams through innovation?·
- How do you get the most value out of AI systems and automation tools, and;
- What can lawyers do to make better use of their legal data?

Legal Innovators is also a conference where you are very welcome to join in and ask questions.

On the day you will hear from an array of great speakers, ranging from people at major law firms, to regional and boutique firms as well, to General Counsel, and as you would expect, experts from some of the world's leading legal tech companies. And you will be very welcome to ask them questions and join the discussion.

So, I hope you will join us at the Legal Innovators event on 11 October in London.
